Second-year Computer Science student building end-to-end software and machine learning systems — from data pipelines and model training to deployed, working applications.

EDUCATION

B.Tech, Computer Science and Engineering

SRM University, Sonapat, Haryana

Aug 2024 – Jul 2028 (Expected)

PROJECTS

SmartMedic — Multi-Disease Predictive Diagnostic System — Python, Scikit-learn, TensorFlow/Keras, Flask/FastAPI

- Built and deployed an end-to-end ML web application processing clinical tabular data and medical imaging for diagnostic support
- Handled class imbalance with SMOTE and trained disease-specific models: Random Forest (heart disease), XGBoost/SVM (diabetes, breast cancer), CNN (pneumonia X-ray classification)
- Built a Flask/FastAPI backend serving trained models to a responsive frontend for real-time clinical data entry

github.com/Vansh7307/medical-diagnosis-ml

Natural Language Generator — Python, Hugging Face Transformers, PyTorch, FastAPI

- Built an end-to-end NLG pipeline converting structured and unstructured data into fluent text for summarization and drafting
- Fine-tuned transformer-based sequence models and evaluated output using BLEU, ROUGE, and human relevance review
- Packaged the model as a REST API with input validation and response filtering

github.com/Vansh7307/natural-language-generator

Face Detection & Tracking System — Python, OpenCV, NumPy

- Built a real-time face detection and tracking pipeline using Haar Cascade classifiers and an OpenCV DNN (SSD/ResNet) module
- Optimized frame-ingestion processing to sustain over 30 FPS under varying distance and lighting conditions

github.com/Vansh7307/Face-Detection

Full-Stack Twitter Clone — Python, Django/Flask, SQL, JavaScript

- Designed a normalized relational schema with follower-graph modeling and implemented salted-password authentication
- Built RESTful endpoints handling likes, retweets, and nested comment threads with chronological feed aggregation

github.com/Vansh7307/Twitter-Clone

EXPERIENCE

Web Developer Intern | Amdox Technologies

Apr 2026 – Jun 2026

- Contributed to front-end and back-end development tasks on real-time web development projects using Node.js and JavaScript

Web Design & Python Intern | EDC Info-net Software Solutions Pvt. Ltd.

Jun 2024 – Aug 2024

- Completed structured internships covering front-end development (HTML, CSS, Bootstrap) and core Python programming fundamentals

Cybersecurity Community Member | CyberZee

Nov 2025 – Feb 2026

- Participated in cybersecurity community workshops, including a Threat Intelligence and OSINT training session

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, SQL

ML / Data: Scikit-learn, TensorFlow/Keras, Pandas, NumPy, NLP, Computer Vision, Statistical Analysis

Web / Tools: Node.js, Flask/FastAPI, HTML/CSS, Git, DBMS, OOP, Data Structures

CERTIFICATIONS

IBM: Data Science with Scala · Data Analysis with Python · Data Visualization with Python · Build Your Own Chatbot · SQL and Relational Databases 101
Deloitte Australia — Data Analytics Job Simulation (Forage)
